Art Unit: 1646

- 1) Claims 1 to 34 are pending in the instant application.
- 2) The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 31 to 35 been renumbered 30 to 34, respectively.

- 3) Claim 30 is uninterpretable as written and, therefore, has not been further treated on the merits.
- 4) Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 to 13 and 17, drawn to an isolated nucleic acid and method of use, classified in class 435, subclass 69.1.
 - II. Claims 14 and 15, drawn to an isolated protein, classified in class 530, subclass 350.
 - III. Claim 16, drawn to an antibody, classified in class 530, subclass 388.22.
 - IV. Claims 18 to 20, drawn to a receptor binding assay, classified in class 435, subclass 7.21 and class 436, subclass 501.
 - V. Claims 21, 22 and 28, drawn to a compound of unspecified constitution, classification undeterminable.

Art Unit: 1646

VI. Claims 23 to 27, 29 and 31 to 34, drawn to a method of treatment by administering a compound of unspecified constitution, classification undeterminable.

The inventions are distinct, each from the other because:

The nucleic acid of invention I, the protein of invention II, the antibody of invention III and the binding compound of invention VI are four different chemical compounds each of which can be made and used without the others. These four different compounds do not reflect a single inventive concept because they do not share a common utility which is based upon a common special technical feature identified as the basis for that common utility.

Inventions V and VI are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can potentially be employed to detect a protein of the instant invention in a sample, which is a materially different process from the method of treatment of invention VI because different objectives are achieved by different methods steps.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1646

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John D. Ulm whose telephone number is (703) 308-4008. The examiner can normally be reached on Monday through Friday from 9:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yvonne Eyler can be reached at (703) 308-6564.
